### CNATRA INSTRUCTION 4614.1T

Subj: UNIFORM MATERIAL MOVEMENT AND ISSUE PRIORITY SYSTEM

Ref: (a) OPNAVINST 4614.1G  
(b) NAVSUP PUB 485

Encl: (1) Force/Activity Designator (F/AD) Assigned to CNATRA Aircraft and Engines  
(2) Criteria for Use by Aviation Units and Intermediate Maintenance Activities (IMA) in selecting Urgency of Need Designator (UND) and Chart Relating F/AD to UND

1. Purpose. To publish procedures for implementation of Uniform Material Movement and Issue Priority System (UMMIPS) as outlined in references (a) and (b).

2. Cancellation. CNATRAINST 4614.1S

3. Scope. This instruction applies to all Chief of Naval Air Training (CNATRA) activities.

4. Background. The Department of Defense (DOD) UMMIPS applies to all services and forces in the assignment of priorities for requisitioning, issuing, and movement of material. The military importance of a requiring activity is indicated by a Force/Activity Designator (F/AD). The F/AD combined with the UND determines the basis for expressing the military urgency for material. The basic policies of the program are outlined in reference (a). The Force/Activity Designators for CNATRA are contained in reference (b).

5. Policy. The following basic policies shall apply in assigning priorities within the framework of references (a) and (b); and enclosures (1) and (2) are provided as a ready reference in the proper computation of priority assignments.

a. In order to maximize the use of low priorities, contractors shall order requirements as soon as they become known. Most urgent requirements are to be placed on order as soon as possible in the following order of priority: (1) Not Mission Capable Supply System (NMCS)/Partial Mission Capable Supply (PMCS)/Casualty Summary Reports (CASREPs); (2) work stoppages in support of operation or training aircraft; (3) zero balance rotatable pool items and critical support equipment; (4) other rotatable pool material and support equipment; (5) non-pool material for turn-in stock; (6) item of a routine nature not listed in above category.

07 JUN 10

b. Assign NMCS/PMCS/CASREP/BROAD ARROW/AWP requisitions priority 02/03 commensurate with assigned F/AD.

c. Assign "O" Level (squadron) work stoppage requisitions, replenishment of SHORCAL/COSBAL Depot Level Repairables (DLRs), and not in stock (zero balance) consumable material priority 05/06 commensurate with assigned F/AD.

d. All other stock replenishment/direct turnover requisitions (i.e., consumable material, repairables, administrative, housekeeping, etc.) are assigned priority 12/13 commensurate with assigned F/AD.

e. Contractors initiating requisitions are responsible for priorities assigned and will maintain records of performance in accordance with reference (a).

f. Contractors shall receive a monthly report depicting, by unit identification code (UIC) and priority, the number of requisitions submitted aboard the naval air station. Stock replenishment requisitions are included. The report is in the following format:

(1) Unit identification code (UIC)

(2) Total requisitions by priority:

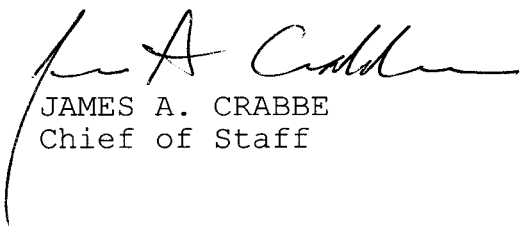

Priority 01-03

Priority 04-08

Priority 09-15

g. Contractors will provide services to meet the requisition processing time frame as specified in reference (a).

6. Contractors will provide services to meet the requisition processing timeframe as specified in reference (a).

  
JAMES A. CRABBE  
Chief of Staff

Distribution:  
CNATRAININST 5215.1S  
List I (A-E)

07 JUN 10

Force/Activity Designator Assigned To  
CNATRA and Activities

1. F/AD II

Navy Flight Demonstration Squadron aircraft and engines

2. F/AD III

T-34C aircraft and PT6A-25 engines

T-44 aircraft and PT6A engines

T-45 aircraft and F405-RR-401 engines

TH-57B, TH-57C aircraft and A250-C20J engines

3. F/AD IV

All other aircraft and engines not included in paragraphs (1) and (2) above.

4. F/AD V

All other activities including staff, training air wings, and base supply activities.

5. Simulators/training devices associated with CNATRA flight training program are assigned the same F/AD as the aircraft they apply to or the aircraft involved in the same phase of pilot or Naval Flight Officer training.

07 JUN 10

Criteria For Use by Aviation Units

(Including Intermediate Maintenance Activities)

UNDDefinition

- A (1) Emergency requirements for weapons, equipment, and material for immediate use without which the aircraft concerned is unable to perform assigned primary operational missions (NMCS). (See Notes 1 and 2.)
- (2) Items required for immediate end use in direct support of equipment essential to the operation of aircraft (e.g., ground support, fire fighting, etcetera) without which the aviation unit is unable to perform its primary mission. (See Notes 1 and 2.)
- (3) Items required to effect emergency replacement or repair of essential physical facilities of an intermediate maintenance activity, without which the activity cannot carry out its mission. (See Notes 1 and 2.)
- (4) Items required to eliminate an existing work stoppage at an Intermediate Maintenance Activity performing repair and maintenance on unserviceables required to reconstitute an authorized Rotatable Pool.
- (5) UND "A" may be used for partial mission capable status (PMCS) requirements only when the item(s) are needed to return primary mission essential subsystems and equipment to operational status.
- B (1) Item(s) required for immediate end use, the lack of which is impairing the operational capability of the aircraft or organizational unit concerned.
- (2) Item(s) required for immediate end use to effect repairs to aircraft, aircraft components (non-pool), and aircraft support equipment, without which the operational capability of the aircraft is impaired or effectiveness in accomplishing assigned missions is reduced.
- (3) Item(s) required for the replacement of mission essential items on allowance and load lists. (See Table II, paragraph UND B (3) of reference (a)).
- (4) Item(s) required to effect replacement or repair of physical plant facilities in an intermediate maintenance activity, without which the effectiveness of the facility is impaired.

07 JUN 10

- (5) Item(s) required for immediate installation to effect repair or replacement of auxiliary equipment, without which the effectiveness of the assigned mission is impaired.
- (6) Item(s) required for immediate end use for primary mission weapons, equipment, and material, without which the aircraft concerned is within 15 days in continental United States (CONUS) and 20 days overseas of a work stoppage or a planned maintenance action for lack of that item.

- C
- (1) Item(s) required to repair or replace administrative support equipment or systems not immediately essential to operational missions of aircraft or organizational units.
  - (2) Item(s) required for routine stock replenishment to meet authorized stockage objectives.
  - (3) Item(s) required for scheduled maintenance and repair, not immediately required, to include non-pool items for which an outstanding requisition does not exist.
  - (4) Required for purposes not specifically covered by any other UND.

NOTE 1: Requirements of this nature are of such a consequence as to require a report to higher authority of a degradation of the requisitioning unit's capability in accordance with established NMCS procedures. (See paragraph 4h(2) in OPNAVINST 5442.4M for definition of NMCS.)

NOTE 2: Aviation unit's primary missions noted in this table are contained in OPNAVINST 3501.2J.
